

Academic Year 2017-2018

Program Data Type 8– Student Site Evaluations

Data regarding Student Site Evaluations includes the following information regarding student feedback on their clinical practicum and internship sites:

1. Total Sites Assessed
2. Sites Meeting/Exceeding Standard
3. Sites Needing Improvement/Remediation
4. Sites Requiring Intervention

This data is generated by students at the end of Clinical Practicum, Clinical Internship I, and Clinical Internship II and is collected by Center Practicum & Internship Coordinator. Depending on how a site performs on the Student Site Evaluation, the site may require feedback and/or intervention from the counseling program staff or faculty, may be required to amend their contract/agreements, or possibly be removed from approved site lists. Student Site Evaluation data is reviewed annually by counseling program faculty and staff, and every three years by the interdisciplinary Counselor Education Program Assessment Committee, and recommendations are then forwarded to the Clinical Practicum & Internship Instructor and Center Practicum & Internship Coordinator, and interventions conducted as determined.

Current Annual Student Site Evaluation Data Report:

Site Data	Fall 2016	Spr 2017	Sum 2017	Fall 2017	Spr 2018	Sum 2018	Fall 2018	Spr 2019
1. Total Sites Assessed	2	2	3	4	6	6		
2. Sites Meeting/Exceeding Standard	2	2	3	3	5	5		
3. Sites Needing Improvement/Remediation	0	0	0	1	1	1		
4. Site Interventions Required	0	0	0	1	1	1		

Final Student Site Evaluation data was collected on practicum/internship sites and one site was found needing improvement/remediation, out of four sites evaluated in Fall 2017, and six sites evaluated in Spring 2018 and Summer 2018. The MHC faculty intervened and has since removed that site from our approved site list. 85% of sites evaluated (five out of six) were rated as meeting or exceeding standards and were retained as approved

sites for the coming academic year. The one site that was removed has one remaining student who will phase out of client work there and then that site will be retired.
